PROFESSIONAL SUMMARY

Full-Stack MERN Developer with hands-on experience building full-stack web applications using React.js, Node.js, Express.js, and MongoDB. Skilled in developing RESTful APIs, JWT-based authentication, database integration, responsive user interfaces, and AI-powered application features. Experienced in building finance management and AI-powered recruitment platforms, with a strong focus on clean, maintainable code, problem-solving, and continuous learning.

EDUCATION

Babu Banarsi Das University, UP, India *Sep 2024 – June 2026*
Master of Computer Applications (MCA)

Chandigarh Engineering College, Punjab, India *July 2020 – March 2023*
Bachelor of Computer Applications (BCA)

Sankat Mochan Public School, UP, India *Apr 2019 – Mar 2020*
Senior Secondary

TECHNICAL SKILLS

Languages: JavaScript (ES6+), Java, SQL

Frontend: React.js, Bootstrap 5, HTML5, CSS3, Tailwind CSS, React Router

Backend & Database: MySQL, MongoDB, Node.js, Express.js, RESTful APIs, JWT Authentication, MVC Architecture

Tools & Technologies: Git, GitHub, Postman, Vercel, Render, Clerk, Gemini API, Cloudinary

Core Concepts: Data Structures, Algorithms, Object-Oriented Programming (OOP)

PROJECTS

Smart-Expense – Personal Expense & Finance Management System *September 2026*
React.js • Vite • Tailwind CSS • Node.js • Express.js • MongoDB • JWT • REST APIs

Live Demo | GitHub

- Developed a full-stack client-based finance management application using the MERN stack for managing salary, expenses, savings, and financial analytics.
- Implemented JWT-based authentication with protected APIs and user-specific financial data.
- Built RESTful APIs using Node.js and Express.js for authentication, salary, expenses, dashboard, and analytics modules.
- Integrated MongoDB Atlas with Mongoose for secure and structured data management.
- Developed a responsive dashboard with expense tracking, balance calculation, savings insights, and financial analytics using Recharts.
- Deployed the application using Vercel (frontend), Render (backend), and MongoDB Atlas (database).

SmartHire — AI-Powered Recruitment & ATS Platform *December 2025 – February 2026*
React.js • Tailwind CSS • Node.js • Express.js • MongoDB • JWT • Clerk • OpenAI/NLP • Nodemailer

Live Demo | GitHub

- Developed an AI-powered recruitment platform for resume screening, candidate ranking, and job matching.
- Implemented ATS resume analysis with resume parsing, skill extraction, ATS scoring, and AI-powered resume improvement suggestions.
- Built recruiter and job-seeker modules with authentication, dashboards, candidate search, filtering, and job management.
- Developed candidate-job matching and ranking based on skills and job requirements.
- Integrated automated shortlisting emails using Nodemailer.

ACHIEVEMENTS

- Coding Decoding War – CGC College: Qualified in a coding challenge focused on real-time problem-solving and output accuracy.
- Innovate India Coding Championship: Participated in a national-level coding competition showcasing algorithmic and logic-building skills.
- Senior NCC Cadet: Participated in various parades, drills, and national-level camps, showcasing teamwork and coordination.
